**ASPIRATORI INDUSTRIALI  
MACCHINE PULIZIA INDUSTRIALE  
DETERGENZA - IGIENE INDUSTRIALE  
ASSISTENZA TECNICA - RICAMBI  
NOLEGGIO- LEASING TASSO ZERO**

Our wide range of cold water washing systems comes on wheels, in vertical version, to take up as little room as possible and guarantees optimum performance with little effort. Top results are guaranteed by various devices designed to give better performance than any other machine. These include Total-Stop, detergent tank incorporated in the machine structure, and easy-to-access internal parts for easy maintenance; its easy-to-use nature and innovative design add the finishing touch to create a machine that is ideal for every type of market.

**TECHNICAL FEATURES F140** • Axial pump with three steel pistons and light alloy head.

**TECHNICAL FEATURES F150** • Axial pump with three steel pistons and brass head.

**TECHNICAL FEATURES F140 T/OT - F140 4P - F150 4P - F180** • Axial pump with three ceramic pistons and brass head.

**All Models:** • Remote controlled AUTOMATIC TOTAL-STOP. • Two-pole (2800 rpm) electric motor. In the 4 P models the motor is a four-pole one (1400 rpm). All are continuous duty, with thermal protection. • Low-pressure detergent delivery with control from the lance. • "Vertical" functioning. • Storage compartments, hose and electric cable supports. • Can be fitted with hose winder kit (optional accessory).

**STANDARD EQUIPMENT:** • Spray gun with heatproof extension and 23ft high-pressure hose with screw couplings. • Lance fitted with low/high-pressure commutation head, detergent control and adjustable water jet angle.
